## DETAILED ACTION

### *Election/Restrictions*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-17, drawn to an apparatus for retrieving a tissue volume comprising a delivery member, a capture component, and a control assembly and a method for use thereof, classified in class 600, subclass 564.
  - II. Claims 18-26, drawn to a system for retrieving a tissue volume comprising a cannula assembly, a capture component, a support member, a drive assembly, a cable stop, a pre-tensioning assembly and a control assembly, classified in class 600, subclass 568.

2. The inventions are distinct, each from the other because of the following reasons:

Inventions II and I are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the pursing cable assembly of the subcombination may be formed with a single tensionable cable which is not compatible with the plurality of cage defining leafs mounted to the pursing cable assembly having a plurality of energizable cables as required by the

combination. The subcombination has separate utility such as by itself or in a combination where the capture component is driven manually without exhibiting stall conditions.

3. Because these inventions are distinct for the reasons given above and the search required for Group II is not required for Group I, restriction for examination purposes as indicated is proper.

4. A telephone call was made to Gerald L. Smith on December 20, 2004 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Charles A. Marmor, II whose telephone number is (571) 272-4730. The examiner can normally be reached on M-TH (7:00-5:00).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Max Hindenburg can be reached on (571) 272-4726. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
